An architectural highlight is located in the Japanese city of Wakayama, not far from Osaka. The construction of the new headquarters of the textile company A-GIRL´S CO. LTD. started in 2022 and the building was completed in the same year. In addition to the exceptional architecture, the material mix of prePATINA ECO ZINC, wood and concrete make the building particularly impressive. The building, constructed using RHEINZINK material, houses offices, an exhibition area and a shop.
