Makai Beach Bar in Ijmuiden: A paradise for connoisseurs and water sports enthusiasts

The Makai Beach Bar in Ijmuiden, Netherlands, has recently had its roof renovated, giving the neighbourhood an impressive upgrade. The new material RHEINZINK PRISMO brushed white+ was used. In this way, the bar focuses not only on functionality but also on aesthetic innovation. The new material from RHEINZINK combines modern technology with timeless design, offering the beach bar and all its visitors a durable and low-maintenance solution that perfectly matches the maritime environment in terms of appearance and functionality.

RHEINZINK PRISMO brushed white+: An innovative material

RHEINZINK has stood for quality and innovation for almost 50 years. The new material sur-face, PRISMO brushed white+, boasts an elegant whitish finish that preserves the natural beauty of the material. The material is characterised by a light, brushed look that will devel-op a natural patina over time. This enhances the characteristic look of the titanium zinc and gives the Makai Beach Bar a unique appearance.

A place for relaxation, sport and enjoyment

The Makai Beach Bar itself is a popular meeting place right on the coast of Ijmuiden. With its relaxed atmosphere and breathtaking views of the sea, it offers both locals and tourists a perfect retreat. The modern and stylish interior, which is now complemented by the new roof made of RHEINZINK PRISMO brushed white+, contributes to the maritime ambience of the bar. In addition to culinary delights, it also offers a wide range of water sports options The adjoining surf school gives guests the opportunity to enjoy the waves of the Dutch coast to the full. Both beginners and experienced water sports enthusiasts can enjoy themselves here.

Protection and durability: the new roof

The new roof made of RHEINZINK PRISMO brushed white+ with double standing seam tech-nology is not only visually appealing, but also offers reliable protection against the climatic and environmental influences of the coastal region. The durability and longevity of the mate-rial minimise maintenance requirements and ensure that the Makai Beach Bar remains in top condition for years to come.
